of Non-Compliant Amendment

Customer No. 01933

Listing of Claims:

1. (Currently Amended) An intrafinder display apparatus for a camera, said intrafinder display apparatus comprising:

a finder optical system for guiding an image of a subject along an optical path to a viewing element;

5 an organic electroluminescence device formed directly on a surface of an optical member ~~arranged near an image formation~~ surface in the optical path of said finder optical system; and

a drive circuit for driving said organic electroluminescence device.

Claim 2 (Canceled).

3. (Currently Amended) ~~An~~ The apparatus according to claim 1, wherein said organic electroluminescence device ~~is comprised of~~ comprises a surface illuminant ~~capable of for~~ selectively switching emission light to a desired color of a plurality of colors, and

5 wherein said drive circuit is ~~so driven as to allow an~~ switch the color of the emission light ~~color of said organic electroluminescence device to be switched~~ in accordance with an operation state of a camera.

Claims 4-6 (Canceled).

Customer No. 01933

7. (Currently Amended) ~~An~~ The apparatus according to claim 5 1, wherein said ~~finder optical system includes optical member comprises~~ a prism optical element, and said organic electroluminescence device is formed on one face of said prism optical element.

Claim 8 (Canceled).

9. (Currently Amended) ~~An~~ the apparatus according to claim 5 1, wherein said organic electroluminescence device is formed on the surface of the optical member by ~~any one of a~~ vapor evaporation, spin coating, dipping and photobleaching method.

10. (Currently Amended) ~~An intrafinder display The apparatus for a camera, comprising: according to claim 1, wherein a liquid crystal display element formed in a finder optical path to allow transmittance of light which is incident from a back surface to vary,~~

~~an said organic electroluminescence device comprised of comprises a surface illuminant capable of for selectively switching emission light to a desired color of a plurality of colors, and formed on said liquid crystal display element; and display control means for allowing the emission light color of said organic electroluminescence device to vary.~~
